

Total Computer to Present at September 2011 Microsoft Windows Azure Cloud CAB Meeting

Microsoft has invited Chief Software Architect, Al Perez of Total Computer Software, to speak at the Windows Azure Cloud Customer Advisory Board (CAB) this coming September. The meeting will take place September 26-28, 2011 in Kirkland, WA. As the only member of the CAB from the public safety industry, Al plans to discuss the success that Total Computer has seen with its flagship product, Total Enforcement™ RMS/CAD, on the Windows Azure Cloud platform and its implications for the future of public safety.

The Microsoft CAB consists of approximately 40-45 exclusive Microsoft partners, most including CIOs from Fortune 500 companies, who represent enterprises, the public sector, and [ISVs](#). Total, along with the other CAB members play a critical role in helping to guide the future direction of the Windows Azure Cloud Computing Platform.

Recently, Microsoft published a Case Study about Total Computer's first client to go live on the Cloud. Total's client is among the first in the country to run a Cloud-based computer aided dispatch and records management system. Click [here](#) to read the Microsoft Case Study.
