

Windows Azure

Microsoft Invites Total to Join the Windows Azure Cloud Platform Advisory Board

Spring Meeting | March 21-23, 2011 | Woodmark Hotel | Kirkland, Washington

Total was invited to become a member of the Windows Azure Platform Customer Advisory Board (CAB). As a long-standing Microsoft Gold Certified partner, Total enthusiastically accepted the invitation to this small, select group of senior technology leaders who play a critical role in helping to guide the future direction of the Windows Azure Cloud Computing Platform. Other distinguished members of the advisory board include **Accenture, Boeing, Citibank, Coca-Cola Enterprises, Credit Suisse, eBay, Expedia, Ford, Home Depot, Lockheed Martin, McDonald's, NASA, NASA Jet Propulsion Laboratories, Netflix, Proctor & Gamble, Siemens, Sony,** and more.

Total is excited to join this exclusive advisory board as the only member in the Public Safety industry. Total Enforcement, Total's flagship product, is the only Records Management System (RMS) and Computer Aided Dispatch (CAD) enterprise application currently running on the Microsoft Azure platform.

The Windows Azure Platform CAB includes 40-45 Microsoft partners who represent enterprises, the public sector, and ISVs. The primary goal of the CAB is to bring Board members together with the Windows Azure Platform business and engineering leadership teams so the CAB may better understand the *long term needs* of the organizations involved and apply that knowledge to shaping the future direction of the platform in ways that assist those organizations to achieve their business goals. Added benefits of participation are the opportunity to network and share ideas with peers, as well as build a stronger relationship with Microsoft.

As a newly active member, Total will be attending the CAB's semi-annual meeting in Kirkland, WA March 21-23, 2011. Microsoft CEO Steve Ballmer will kick off the meeting by sharing an update on his cloud leadership team and insights into Microsoft's cloud strategy, followed by a Q&A with board members. The meeting will then resume with two days of highly interactive sessions in which the Windows Azure Platform product teams will share their planned investments in shaping the future of the platform with the advisory board.

Total is pleased to have been selected for this opportunity and is highly optimistic about what Cloud Computing will bring to the future.
